# Outdoor Living Solutions

Infrascapes brings with it over 40 years of combined experience of all its associate companies; in architecture, landscaping and other outdoor services.

Each product is a benchmark in its field in terms of quality and innovation; using material in its natural form or as a composite. Combined with exceptional service and timely delivery schedules, Infrascapes offers end-to-end solutions for outdoors - both soft scapes and hard scapes.

We now bring to you an extensive range of outdoor products and solutions across various specialised fields including benches & seating, outdoor elements, architectural solutions and play & fitness equipment - your one-stop-shop for custom-made options to make a mark in any outdoor environment.

# Our Core Strengths

---

We offer a unique range of end-to-end solutions - a one-point contact for all your exterior requirements in a wide array of materials. We work in various materials, in natural and composite form, to custom-create numerous applications, some of which are:

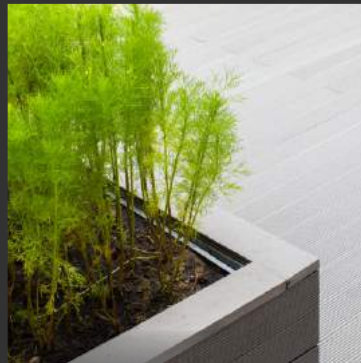

Pergolas & Gazebos

Cladding & Louvers

Benches & Seating

Planters & Dustbins

Playground & Outdoor  
Fitness Equipment

Water Park Equipment

Bollards & Lamp Posts

Decking & Railings

Sports Flooring

Grating & Manhole Covers

# Structures | Pergola, Gazebos, Shelters

---

Shades like Pergolas, Gazebos and Cabanas are made from wood composite material are more durable, more attractive, more fade & scratch resistant and more reliable. Structure gives the look of real wood but does not need maintenance of real wood structure and is resistant to all weather conditions.

# Structures | Pergola

---

# Structures | Gazebos

---

# Structures | Stead

Infrascapes has introduced the standard pergolas through the Stead series, they are differentiated by their edge which comes in classical and modern style. Stead standard pergola comes in three sizes small, medium and big.

These pergolas are made up of wood composite material, they give look and feel of normal wooden structure but they don't require it's high maintenance.

Stead series is divided into small, medium and big based on their pillar, beam and rafters measurements.

Series	Pillar	Beam	Rafters
Stead (S)	100 x 100	100 x 60	100 x 60
Stead (M)	150 x 150	160 x 80	100 x 60
Stead (B)	150 x 150	100 x 60	160 x 80

\* all measurement in (mm)

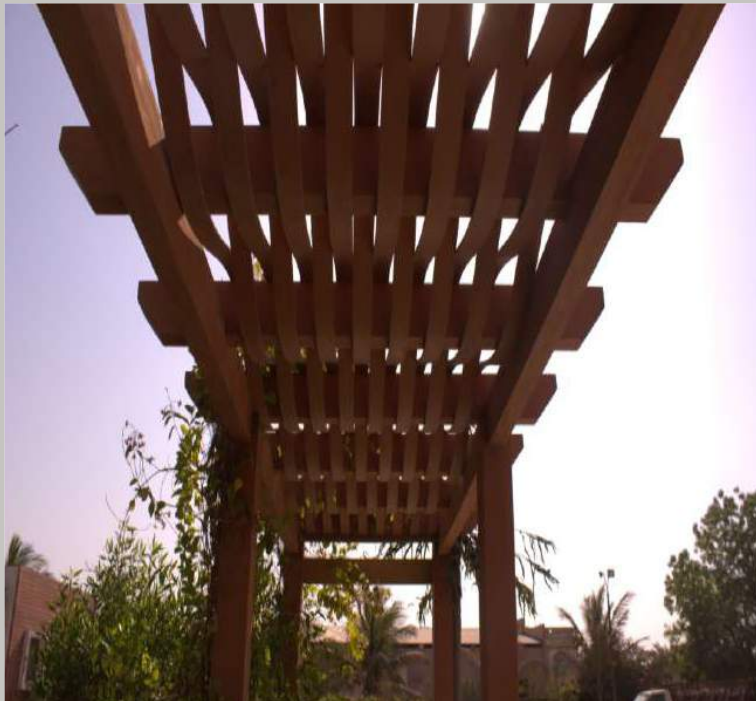

# Structures | Stead Wave

---

Stead wave range consist range of attractive woven pergolas. Stead wave pergolas can be made from either wood composite material or nylon composite material.

This pergolas are more beautiful, more durable, more fade and scratch resistant. They also require less maintenance than normal wooden structure.

# Structures | Allure Wave

---

Evoked wave series consists of beautiful pergolas adorned with wave design. The wave design comes in two materials: polen and wood composite.

Pergola is made using polen material, it is recyclable and eco-friendly. The material is water & heat resistant and washable.

# Structures | Allure Wave

---

# Structures | Allure Random

---

Evolve random is the range of pergolas which are the design combination of weave and composite materials.

The weave and the wood or nylon composite, can be placed according to the wish to create unique effect in the pergola. These structures have the look of wooden structure, but they don't require it's high maintenance.

# Structures | Belvedere

---

# Facades, Entrances & Canopies

---

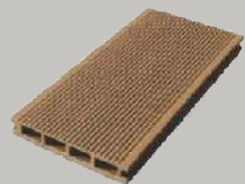

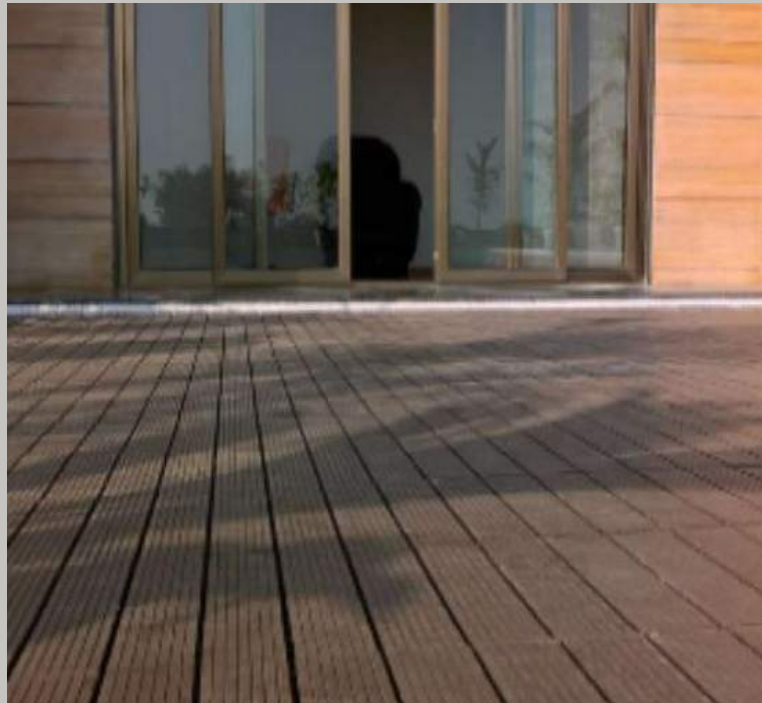

# Decking & Flooring

---

Wood composite can be used to make low maintenance decking which is suitable for every need. Elegant colours, combined with different surface finishes results in an unmatched choices for different conditions that look great and will stay that way. High performance, low on maintenance, wood composite reversible deck planks are fitted to an aluminum framework with concealed fixtures, offering barefoot safe anti-skid surfaces.

Wood composite profiles lend a distinct impression on facades. These profiles are highly resistant to fading or dis-coloration and require no hassles of periodic maintenance. Interlocking assembly ensures no water leaks to the building infrastructure and also no visible fasteners, hollow no core technology keeps the wall insulated.

Wood composite cladding blends perfectly with other materials in contemporary or futuristic design, unboxing a whole new world of possibilities.
